Dust (OEL - Occupational Exposure Limits)	Total Dust	10mg/m ³
---	------------	---------------------

8.2 Exposure controls:

8.2.1 Appropriate engineering controls:

Ventilation should be sufficient to effectively remove and prevent buildup of any dusts or fumes that may be generated during handling or thermal processing. If engineering measures are not sufficient to maintain concentrations of dust particulates below the Occupational Exposure Limit (OEL), suitable respiratory protection must be worn. Provide eyewash station.

8.2.2 Individual protection measures, such as personal protective equipment:

Eye/face protection: Face shield is recommended. Wear safety glasses with side shields (or goggles). Use tight fitting goggles if dust is generated.

Hand protection: Wear appropriate chemical resistant gloves.

Respiratory protection: Use approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. Respiratory protection not required.

Other: Wear suitable protective clothing.

Considerations: Keep away from food and drinks. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. National regulations for fertilizers may apply.

8.2.3 Environmental protection measures: Avoid discharge into sewers or drains, water courses or onto the ground.
